

Network Infrastructure

Having the wrong infrastructure, or even having the right infrastructure configured the wrong way can be costly to your business. It can result in your systems running very slow or even down-time, which means your staff can't work to their full potential, hence causing decreased productivity.

At ACEIT we can assess your current infrastructure and advise you on the most effective infrastructure setup for your business, based on how many staff you have, your requirements and your plans for the future of the business.

Communications

We can provide you with a complete communications infrastructure solution to suit your businesses requirements.

We can assist you with:

- Cat5, Cat 5e & Cat 6 Cabling
- Installation of data points
- Patch panels
- Cabinets
- VoIP systems (Voice over Internet protocol)

General Infrastructure

We can tailor a solution to enhance your businesses general infrastructure & allow maximum performance and increased productivity.

We partner with IBM, HP, Cisco, Netcomm, Microsoft, VMware and work closely with these companies to enable us to provide you with the most up-to-date information & best after-sales support available.

We can provide you with:

- Servers
- UPS's
- Tape Drives
- Switches
- Access Controls
- SAN/NAS
- Network printers
- And much more

Connectivity

We can provide your business with a huge range of connectivity solutions. Let us take the hassle out of internet plans by finding the right one to suit your needs and budget.

We also offer a large range of modems, routers, network switches, kvm switches and firewalls. We specialise in wireless solutions to suit your home, office or even VPN access for your staff on the road. No matter what you need ... We have the answers!
